IMMIGRANT ARRIVALS TO ONTARIO

IMMIGRANT LANDINGS TO CANADA WITH ONTARIO AS THE PROVINCE OF INTENDED DESTINATION

JANUARY 1, 1981 TO DECEMBER 31, 1981

INTRODUCTION

The summary and tables presented in this report pertain to the total number of immigrants landing in Canada in the 1981 calendar year for whom Ontario was the province of destination.

A number of changes have been made both in terminology and in the presentation of the immigrant landing statistics. These changes affect a number of the tables:

COMMUNITY OF DESTINATION

The number of communities for which the statistics in all the tables are shown has been increased to 22 from 18, to include Brampton, Burlington, Mississauga and Oakville. As well, the figures for Waterloo are now combined with those for Kitchener. In another change, the figures indicated for Toronto are now for Metropolitan Toronto rather than for the City of Toronto as in previous tabulations. There has also been a re-calculation of the figures for Windsor which were under-represented in previous years' tables.

IMMIGRANT CATEGORY (Table 1)

A summary of the definitions used by Employment and Immigration Canada for the various immigrant categories is appended at the back of this report. This has been included in response to numerous queries.

COUNTRY OF LAST PERMANENT RESIDENCE AND COUNTRY OF BIRTH (Tables 2 and 3)

No change.

AGE AND SEX (Tables 4 and 4A)

Table 4A has been included to show sex and age as a percentage of the total population in addition to the original Table 4 which indicates the age distributions for each sex category

OFFICIAL LANGUAGE ABILITY (Table 5)

Employment and Immigration Canada has adopted this terminology in place of "Canadian Language Capability" used previously.

MOTHER TONGUE (Table 7)

Employment and Immigration Canada has adopted this terminology in place of "Native Language" used previously.

YEARS OF SCHOOLING AND INTENDED OCCUPATION (Tables 6, 6A, 8 and 8A)

For each of these characteristics, an additional table has been included to show the figures for the immigrant population 15 years of age and over in addition to the original tables for the total immigrant population. This has been done to provide consistency in relating immigrant data to the Census of Canada. For the latter, Statistics Canada obtains information about education and occupation only for the population 15 years of age and over.

INTENDED WORK FORCE PARTICIPATION (Table 8B)

This is a new table, showing the number and percentage of immigrants intending to enter the work force. Also in Tables 8 and 8A, which present intended occupation, the percentages are based on the number of immigrants intending to enter the work force rather than for the total immigrant population as in the 1980 tables.

Note that Tables 4A, 6A and 8A were included in the set of immigrant landing tables for the first six months of 1981. Since, however, the six-months' figures do not include a summary, attention was not drawn to these additions in the earlier set of tables.

SUMMARY

The total number of immigrant landings to Canada with Ontario as the province of intended destination in 1981 was reported by Employment and Immigration Canada to be 54,890, a decrease of 7,060 over the 1980 total of 61,950 but greater by 8,633 over the 1979 total of 46,257.

COMMUNITY OF DESTINATION

As indicated in the Introduction, 4 communities have been added to the tables, bringing the total number to 22. For the first time, the tables show the number of immigrants destined to Brampton, Burlington, Mississauga and Oakville, while the figures for Waterloo are shown with Kitchener as follows:

Brampton	750
Burlington	436
Mississauga	3,303
Oakville	428
Kitchener-Waterloo	1,201

This reduces the percentage in the "other" category to 15 percent from the 40 percent shown in 1980 and the 35 percent in 1979. A detailed examination of all of the geographic locations in Ontario coded by Employment and Immigration Canada for 1981 indicates that for the more than 300 communities of destination coded and not included in these tables, the number of immigrants to each ranged from zero to 210 with an average of 26 immigrants per community.

The fact that the figures for Toronto are now for Metropolitan Toronto rather than for the City of Toronto, as noted in the Introduction, accounts for the apparently big increase to 53 percent in 1981 compared to 38 percent shown for Toronto in 1980.

Metropolitan Toronto remains the largest centre of attraction for Ontario-bound immigrants with, as noted, 53 percent headed there. When the percentages for Mississauga and Brampton are added, it is clear that more than 60 percent of Ontario's immigrants in 1981 planned to settle in the Metropolitan Toronto-Peel Region area of the province. Outside of this area, Ottawa attracted the most immigrants--3,042 in number--accounting for 6 percent of the total, a slight increase

over 1980. Six other urban centres were the destination for approximately 11 percent of Ontario's immigrants: Hamilton (3 percent), London, Kitchener-Waterloo and Windsor (approximately 2 percent each) and Cambridge and St. Catharines (approximately 1 percent each).

IMMIGRANT CATEGORY (Table 1)

The immigrant categories are determined by the Federal Government. The 1981 province-wide distribution for the various categories is shown below:

IMMIGRANTS DESTINED FOR ONTARIO 1981

IMMIGRANT CATEGORY	NUMBER	PERCENT
Family Class	23,365	42.6
Assisted Relatives	7,105	13.0
Refugees & Designated Classes	5,523	10.1
Independents	17,624	32.1
Others	1,273	2.3
TOTAL	54,890	100

The decline in the total number of immigrants to Ontario of 7,060 is a reflection of a decrease of approximately 10,000 in the refugees and designated classes together with an increase of approximately 2,000 in the independents category and of 1,400 in the assisted relatives category. In relation to the total Ontario-bound immigration, family class increased by 5, assisted relatives by 4, and independents by 7 percent respectively, while the refugees and designated classes decreased from 25 to 10 percent. As a result, the family class immigrants and the independents constituted the largest proportions of 1981 Ontario immigrants.

More than half of those in the family and assisted relatives categories and just half of the independents were headed for Metropolitan Toronto as were 40 percent of those in the refugees and designated classes. The fact that 16 percent of those in the refugees and designated classes and 20 percent of the independents were bound for "other localities" indicates a wider dispersal

across the province of those in these categories to communities other than the 22 listed, in contrast to immigrants in the family class and assisted relatives (12 percent each).

COUNTRY OF LAST PERMANENT RESIDENCE (Table 2)

The largest source country of immigrants destined for Ontario in 1981 was the United Kingdom, by a slightly higher percentage of 19 compared to 15 percent in 1980. The United Kingdom was followed by the Caribbean and Guyana with 11 percent, a slight increase over 1980. Vietnam, which was the country of last permanent residence for 15 percent in 1980, accounted for only 5 percent, reflecting the decrease in the number and proportion of refugees in 1981. Immigration from Asian countries generally (excluding the Middle East) declined to 30 percent in 1981 in contrast to 41 percent in 1980, again reflecting the decrease in the number of refugees to Ontario. There were very slight increases in the proportions of immigrants from South Asia, Hong Kong, and the Philippines. Immigration from all European countries other than the United Kingdom rose in 1981 to 21 from 17 percent in 1980, an increase accounted for largely by higher proportions from Eastern Europe and from the western and northern European areas, while immigration from the Mediterranean countries remained at approximately the same level.

COUNTRY OF BIRTH (Table 3)

The proportions of immigrants born in specific countries or within the larger areas shown are very similiar to those for country of last permanent residence as noted in the preceding paragraph. The figures do indicate small numbers of immigrants coming to Ontario from the United Kingdom, the United States and Hong Kong who were born elsewhere, although the percentage differences are slight.

AGE AND SEX (Tables 4 and 4A)

The age distribution of 1981 immigrants was comparable to that for 1980 with slight increases in the proportions over 21 years of age and slight declines for those age 21 or lower. The proportion of adult immigrants (over 21) increased to 72 percent from 69, with almost 60 percent of these in the 22 to 44 years of age category. As in 1980, half of the near 30 percent in the under-19 age groups were in the 5 to 14 age bracket.

Female immigrants continued to outnumber males, but by more than twice the numbers for the previous year: by 1,306 compared to 510 in 1980 and 1,600 in 1979. The difference was reflected largely in the over-45 and the 19 to 21 age groups, although male immigrants outnumbered females by small percentages in all age categories below 19.

OFFICIAL LANGUAGE ABILITY (Table 5)

A considerable increase occurred in 1981 in the proportion of immigrants having English language capability, with 56 percent indicating English language capability only and another 2 percent having both English and French. This constitutes a percentage increase of 10 over 1980. Conversely, the proportion of immigrants with neither official language declined by 10 percentage points to 40 percent in 1981. Again, approximately 4 percent either knew French or both English and French.

YEARS OF SCHOOLING (Table 6 and 6A)

The province-wide distribution for years of schooling of 1981 immigrants is set out below:

Years of Schooling	All immigrants		Immigrants age 15 and over intending to enter the work force	
	Number	Percent	Number	Percent
Under 5	13,570	24.7	4,781	11.0
5 to 8	9,788	17.8	7,405	17.0
9 to 12	17,901	32.6	17,767	40.8
13 or more	13,392	24.4	13,390	30.8
Not stated	239	0.4	165	0.4
TOTAL:	54,890	100	43,508	100

As in 1980, the largest proportion of immigrants, almost a third, have from 9 to 12 years of schooling. However, the percentage of those with 13 or more years of schooling increased by 5 percent to 24, almost a quarter of all the 1981 immigrants. This was counter-balanced by a decline in the proportions of those with 8 years or less to 42 percent as compared with 50 percent in 1980. Of those immigrants intending to enter the work force, the proportion of those with 9 years or more of schooling was considerably higher: 41 percent with 9 to 12 years and 31 percent with 13 or more years. Only 11 percent of those heading for the work force had less than 5 years.

MOTHER TONGUE (Table 7)

Once again, English predominates as the mother tongue, increasing to 38 percent compared with 30 percent in 1980, followed by Cantonese (10 percent in 1981 compared to 12 in 1980). South Asian and South-East Asian languages were characteristic of 9 and 7 percent of 1981 immigrants respectively, while Eastern European and Other European languages were reported by 8 and 7 percent respectively, a slight increase from the previous year. Only 2 percent indicated Vietnamese, down from 9 percent in 1980. A summary table of mother tongues is set out below:

MOTHER TONGUE	NUMBER	PERCENT
English	20,660	37.6
French	410	0.8
Other European	13,673	24.9
Asian	17,154	31.3
Other	2,993	5.5
TOTAL:	54,890	100

INTENDED OCCUPATION AND WORK FORCE PARTICIPATION (Table 8,8A,and 8B)

Of the 1981 immigrants 15 years of age and over, 74 percent intended to enter the work force. The remaining one-quarter included students, spouses and others.

Eighteen percent of the 1981 immigrant labour force population age 15 and over were classified in professional and technical fields, 15 percent in the manufacturing, mechanical and operating categories, 9 percent in sales and service, and 5 percent in managerial and administrative occupations. The percentages for the other occupational categories ranged from 3 to less than 1 percent.

Comparisons with the occupational distribution of 1980 immigrants are difficult because of the changes in the presentation of the statistics for 1981, particularly since the 1980 figures included immigrants under 15 years of age and the percentages were based on the total immigrant population including those not intending to enter the labour force.

APPENDIX

IMMIGRANT CATEGORY - DEFINITIONS*

Canada's Immigration Act sets forth three basic classes of admissible immigrants: the family class, Convention refugees, and independent and other immigrants (including assisted relatives).

Family Class

The family class is comprised of certain close relatives sponsored by a Canadian citizen or permanent resident at least 18 years of age and residing in Canada. The Act specifies eight categories of relatives eligible for admission under the family class. Individuals in the family class will not be assessed under the point system, but must meet specified standards. The sponsoring relative in Canada is required to sign a statement promising to provide for the lodging, care and maintenance of the applicant and accompanying dependents, for a period of up to ten years.

Convention Refugees

The refugee class is based on the definition from the United Nations Convention and Protocol Relating to the Status of Refugees. Refugees seeking resettlement in Canada are assessed against factors relating to their adaptability to Canadian life and on the amount of settlement assistance available to them in Canada, or are admitted on humanitarian grounds in times of crisis.

Independent and Other Immigrants

This class includes assisted relatives (see below), entrepreneurs, retired persons, those who intend to be self-employed, and others who apply to immigrate on their own initiative at Canadian government offices abroad. Except for retirees, persons in this class are assessed and selected according to the point system.

Assisted Relatives

These are people, other than members of the family class, who have kin in Canada willing to help them get established here. The Immigration Act specifies the categories of relatives eligible to apply under this category. The point system applies.
